Welcome to Pyzlides

A Python library for creating beautiful presentations

Generate PDF slides using declarative Python code

Key Features

- Declarative slide creation using Python classes

- Customizable themes and layouts

- PDF output in landscape presentation format

- Easy to use - just write Python code!

Getting Started

1. Install the library: pip install pyzlides

2. Create slide files using Python classes

3. Configure themes in config.yaml

4. Generate PDF: python -m pyzlides generate_pdf

Thank you for using Pyzlides!
